

How to use Jacutin® Pedicul Spray

Flip up special atomizer and from 1-2 cm away spray directly onto scalp. Avoid getting the product in your eyes, nose or mouth. Do not sniff, swallow, or inhale while spraying.

Use on dry hair only, separating strands of hair for individual treatment (from roots to ends). Also apply to hair at the temples and at the base of the neck.

For each strand of short hair spray one brief puff (1-2 seconds), for long, thick hair spray two brief puffs. Make sure to treat every section of hair, it should be slightly and evenly damp.

Allow to act for 30 minutes. Do not cover head. Wash hair with shampoo and carefully rinse several times. Remove lice and nits by combing hair with a special nit comb (e.g. Jacutin® Nit Comb).

To ensure the treatment has been successful, inspect hair after 8 days. If live lice or new nits are found, repeat treatment as before.

How to use Jacutin® Pedicul Spray with Crap Lice

Apply to all affected parts of the body (e.g. hair in the pubic and perineal region, leg hair), following the instructions for the treatment of head lice.

After 30 minutes wash all body parts treated with Jacutin® Pedicul Spray with soap/syndet bar and carefully rinse several times.

What else can you do?

Wash all bed linens and underwear in hot water (60°C).

Items of clothing (e.g. hats, scarves, jumpers, cardigans etc.) or cuddly toys that cannot be washed in hot water, can be put into the freezer for 24 hours at -18°C minimum, or kept at room temperature in a tightly sealed plastic bag for 3 days.

Wash hair combs, brushes, hair clasps etc. after each use in very hot water.

Vacuum all couch cushions, carpets, car seats etc. to remove any hair. Other floor coverings (e.g. laminates, tiles, vinyl etc.) can simply be wiped with a damp cloth.

Tipp

Since lice are too big to get into mattresses or pillows, washing their covers will suffice.

Warnings

For external use only.

Only use Jacutin® Pedicul Spray in a well ventilated room.

Avoid ingestion or inhalation of large quantities of Jacutin® Pedicul Spray.

Jacutin® Pedicul Spray should not be used during the first three months of pregnancy, while breastfeeding, with infants, when suffering from asthma or bronchopulmonary disease or with allergy to active ingredients. Jacutin® Pedicul Spray is flammable. Do not spray on a naked flame or red-hot surface (e.g. hot plate).

Stay away from open flames during treatment (e.g. gas boiler) Jacutin® Pedicul Spray will harm cold-blooded animals (lice, fleas, reptiles, fish etc.) and must not be used on pets.

Jacutin® Pedicul Spray is available from pharmacies without prescription.
