

Please read the following usage instructions carefully because they contain important information that you need to pay attention to when using this medication. If you have questions please ask your doctor or pharmacist.

## Usage Information

### Jacutin® Pedicul Fluid

**What are the ingredients of Jacutin Pedicul Fluid?** It consists of 100% pure dimeticon (silicon oil) and contains no colouring, perfume or preservatives.

**When is Jacutin Pedicul Fluid used?** The fluid is used with head lice infestations. Lice and nits are effectively and non-toxically treated.

**How does Jacutin Pedicul Fluid work?** The fluid blocks the breathing holes of lice and nits due to its particular physical properties. After only a 10-minute application time the lice suffocate and the development of the nits is effectively blocked because of the treatment. The spread and reproduction of the parasites is thus inhibited.

**For whom is Jacutin Pedicul Fluid suitable?** **Jacutin Pedicul Fluid** can be used by people of any age and during pregnancy and breastfeeding.

**When should the product not be used?** The fluid should not be used if you have a known hypersensitivity (allergy) to dimeticon.

**What interactions with other drugs are possible?** There are no known interactions.

**Are there any known undesirable side effects or incompatibilities?** Occasionally skin irritation such as itching or reddening of the skin can occur. These are generally temporary and not severe. If you notice undesirable side effects that are not listed in these usage instructions, please contact your doctor or pharmacist.

**How is Jacutin Pedicul Fluid used?** The product is intended for external use only on undamaged skin.

On the label on the back of the bottle are printed markings that help you to measure the appropriate amount of fluid. The distance between the individual markings corresponds to about 25 ml.

#### Dosage Guidelines

Hair length	Approximate quantity for 1 person	Approximate quantity for 1 person	
		100 ml bottle (upright)	200 ml bottle (upright)
Short (to the ears)	25–50 ml	1–2 graduation marks	1–2 graduation marks
Medium (about shoulder length)	50–75 ml	2–3 graduation marks	2–3 graduation marks
Long* (past the shoulders)	75–100 ml	3 graduation marks or the entire contents	3–4 graduation marks

\* **Note:** If you have **very long or particularly thick hair**, a larger amount may be necessary to cover the hair and the scalp completely.

1. Apply **Jacutin Pedicul Fluid** to **dry** hair and spread it around until your hair and scalp are completely covered with the fluid.

2. Make sure you do not get the product in your eyes.

3. Leave the fluid to act for at least **10 minutes** after application.

4. After leaving the fluid on your hair for 10 minutes, comb your hair with a nit comb strand by strand. Combing out your hair is extremely important to completely remove the lice and nits. The fluid makes combing out easier. Even long hair becomes much easier to comb.

5. Finally wash your hair thoroughly with warm water and your usual shampoo once or twice.

For the next 10 days, you should regularly check whether there are again live lice and/or nits in the hair. If this is the case, please repeat the whole treatment.

To make sure that any lice that may have newly hatched are eliminated, please repeat the treatment 8 – 10 \*\* days after the first treatment.

\*\* recommendation by the Robert Koch Institute

#### Decontamination of surroundings and preventing a new infection

- Check all family members for head lice for at least 10 days. If there is an infestation, this must also be treated.
- Wash clothing, bed linen and towels used by the affected person at a temperature of at least 60°C.
- Non-washable items should be placed in a plastic bag at room temperature for at least two weeks or for at least 24 hours at –15 to –18°C in a freezer.
- Hair products (brushes, combs) should be immersed in 60°C water for 10 minutes.
- Carpets, floors and upholstered furniture should be thoroughly vacuumed and the vacuum cleaner bag thrown away afterwards.

**What else needs to be considered?** Keep **Jacutin Pedicul Fluid** out of the reach of children.

Store the fluid below 30°C.

If **Jacutin Pedicul Fluid** gets in your eyes, a slight irritation of the eyes may develop. If the fluid accidentally comes into contact with your eyes, rinse your eyes under flowing, clear water. If irritation persists please see your doctor or an ophthalmologist.

The expiry date is printed on the bottle and on the packaging. Do not use the contents of the bottle after this date.

**In what package sizes is Jacutin Pedicul Fluid available?**

- 100 ml
- 200 ml with a nit comb
