

Please read the following instructions for use carefully because they contain important information that you need to heed when using this medicinal product. If you have any further questions, ask your doctor or pharmacist.

PACKAGE INFORMATION LEAFLET

Jacutin® Pedicul Fluid

What are the ingredients of Jacutin Pedicul Fluid? It consists of 100 % pure dimethicone (silicone oil) and is **free from** colourings, perfume and preservatives.

When is Jacutin Pedicul Fluid used? The fluid is used to treat head lice infestations. Head lice and nits are effectively treated without the use of chemical insecticides.

How does Jacutin Pedicul Fluid work? Because of its special physical properties, the fluid enters into the breathing orifices of the lice and their nits. After an application time of only 10 minutes, the lice suffocate. Nits are also stunted in their development by this treatment, thus preventing the spread and propagation of the parasites.

Who can use Jacutin Pedicul Fluid? Jacutin Pedicul Fluid can be used at any age and also during pregnancy and while breast-feeding.

When must the product not be used? The fluid must not be used for a known hypersensitivity (allergy) to dimethicone.

What are possible interactions? There are no known interactions.

What are known adverse reactions or intolerances? As an uncommon reaction, there may be skin irritations such as itching or reddening of the skin. These are generally mild and transient. If you notice any adverse reactions not listed in this patient information leaflet, please inform your doctor or pharmacist.

How do I use Jacutin Pedicul Fluid? The product is for external use only on unbroken skin. Graduation marks are printed on the back label of the bottle to help you measure the required amount of fluid. The distance between the individual graduation marks equates to approx. 25mL.

Dosage guidelines

Hair length	Quantity for 1 person	100 mL bottle (upright)	200 mL bottle (upright)
Short (to the ears)	25 - 50 ml	1 - 2 graduation marks	1 - 2 graduation marks
Medium (approx. shoulder length)	50 - 75 ml	2 - 3 graduation marks	2 - 3 graduation marks
Long* (over shoulder length)	75 - 100 ml	3 graduation marks or total content	3 - 4 graduation marks

* **Note: Very long or particularly thick hair** may require a greater quantity to moisten hair and scalp completely.

1. Apply **Jacutin Pedicul Fluid** to **dry hair** and rub it in until hair and scalp are completely moistened with the fluid.
2. Make sure to keep the product out of eyes and ears.

3. After application, leave the fluid for at least **10 minutes** to take effect.
4. After these 10 minutes, comb the hair strand by strand with a nit comb. The fluid makes combing easier. Even long hair is very easy to comb.

5. Then wash your hair once or twice thoroughly with warm water and a standard shampoo.

For the next 10 days, you need to check regularly for new live lice in the hair and/or fresh nits close to the hairline. If that is the case, repeat the entire Treatment process.

To make sure that any lice that may have hatched later are also got rid of, repeat the treatment 8-10** days after the initial treatment.

** as recommended by the Robert-Koch Institute

Environment cleaning and prevention of a new infestation

- Check the heads of all other family members for at least 10 days for any signs of lice or nits. Any infestation found needs to be treated.
- Wash clothing, bed sheets and towels of the affected person at a minimum 60°C wash.
- Place non-washable items in a plastic sack for at least 3 days at room temperature or at least 24 hours at -15 to -18°C in a freezer.
- Immerse hair products (combs, brushes) in hot water (60°C) for 10 minutes.
- Vacuum carpets, floors and upholstery carefully and dispose of the vacuum cleaner bag.

What else must I be aware of? Store **Jacutin Pedicul Fluid** out of the reach of children

Store at temperatures below 30°C.

Fluid getting into the eyes may cause irritation to the eyes. After accidental contact of the fluid with the eyes, flush eyes with clear running water. If the irritation continues, please seek medical or ophthalmological advice.

The expiry date of the package is printed on the bottle and on the box. Do not use the content of this package after the expiry date.

This medicinal product must not be disposed in waste water or with household waste. Ask your pharmacists about the disposal of this medicinal product, when you no longer need it. This measure helps to protect the environment.

In what package sizes is Jacutin Pedicul Fluid available?

- 100 ml
- 200 ml with a nit comb
